ABOUT ME

Full-stack developer focused on backend systems, real-time applications, and AI integrations, primarily working with the MERN stack, Next.js, and Django. Built RoastRoom, a live multiplayer debate platform where an AI judge scores each round in real time, and SafeCity Hub, a crime-reporting system with role-based dashboards and live incident tracking. Interned at Softmusk Solutions, shipping Django-based systems and REST APIs. Google Cloud and AWS certified, with 20+ open-source projects on GitHub. Currently in the first year of a B.Tech CSE (AI/ML) at Parul University (PIET), deepening expertise in scalable systems and machine learning.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java

Frameworks: React.js, Next.js, Node.js, Express.js, Django, Tailwind CSS, Bootstrap, Socket.io

Databases: MongoDB, PostgreSQL, Firebase (Firestore, Auth, Storage)

Cloud & DevOps: Google Cloud Platform (GCP), AWS, Firebase, Render

Tools: Git, GitHub, Postman, Figma, Android Studio, Arduino

Other: REST APIs, WebSockets, GPT/AI API Integration, RBAC, AES Encryption, IoT, Agile

EXPERIENCE

Software Development Intern Jun 2025 – Aug 2025

Softmusk Solutions Pvt. Ltd. — Sawantwadi, India

- Worked on Django-based backend systems and REST APIs, contributing to real-world production features
- Handled frontend integration and connected backend services to UI components across a live codebase

PROJECTS

RoastRoom — AI-Powered Debate Platform

- Built a live multiplayer platform where players go head-to-head in debates and roast battles, judged in real time by an AI
- Used Socket.io for the multiplayer layer and OpenAI's GPT API to score each round on logic, wit, and creativity

Stack: Node.js, Express.js, React.js, Socket.io, OpenAI GPT API

SafeCity Hub — Crime Reporting & Analytics Platform Jul – Aug 2025

- Created a platform where citizens report incidents and local authorities track them through live dashboards
- Built role-based access for Citizens, Officers, and Admins; added live incident feeds and analytics for decision-making

Stack: Python, Django

Opti-Time — AI-Based Timetable Generator

- Built an academic scheduler that auto-generates conflict-free timetables — handles batch splits, faculty constraints, and room allocation

Stack: Python, Django

AES Tool / CarHub / IoT Projects

- AES Tool: built a Java app to encrypt and decrypt data using AES — a hands-on dive into symmetric cryptography
- CarHub: designed a car listing site prototype; IoT: wired up several hardware projects with Arduino and embedded C

Stack: Java · HTML, CSS, JavaScript · Arduino, C/C++

EDUCATION

B.Tech — Computer Science & Engineering (AI/ML Specialization) 2026 – 2029

Parul Institute of Engineering and Technology (PIET), Parul University — Vadodara, Gujarat

Board: Parul University · Lateral Entry, 2nd Year

Diploma — Computer Engineering 2023 – 2026

Yashwantrao Bhonsale Institute of Technology (YBIT) — Sawantwadi, Sindhudurg

Board: Maharashtra State Board of Technical Education (MSBTE)

CERTIFICATIONS

Google Cloud Generative AI Leader — *Google Cloud* 2026
Google Cloud Arcade Facilitator Program — *Google Cloud* 2026
Google Cloud Skill Badges (Multiple) — *Google Cloud* 2025 – 2026
AWS Financial Services Data Analytics — *Amazon Web Services* 2025
Agile Project Management — *HP LIFE* 2025

ADDITIONAL

- 20+ open-source repos on GitHub — github.com/vedangdhuri
